

## Senior Modelling Consultant

Pitney Bowes MapInfo is now seeking a talented and highly motivated Senior Modelling Consultant. This is an exciting opportunity to join the Predictive Analytics team within a rapidly expanding and market leading global technology company at a key stage in its development. Based in the Windsor office, this position will report directly to the Client Services Manager.

### Responsibilities will include:

- Evaluates the reliability of source information and organise results into a form compatible to conducting analysis
- Conducts Statistical analysis independently
- Produces and delivers presentation to clients
- Analyse and work with complex data sources using various software tools.
- Assist in business development of Predictive Analytics services; providing sales support; involvement in the development of new customer offerings

### Qualifications & Experience:

- The successful candidates will hold a degree or equivalent qualification preferably gained within a mathematical or sciences subject. Post graduate qualifications or a Maths 'A' Level would also be advantageous
- Candidates should have commercial experience preferably gained within either the Retail, Real Estate or GIS industries
- It is a pre-requisite that candidates are able to display an in-depth aptitude for statistics as well as to writing code for data manipulation purposes
- The successful candidate will have strong interpersonal skills and be able to articulate themselves well in writing
- It is essential that candidate have a good general level of IT literacy
- The ability to speak another European language fluently aside English would be looked upon favourably as would GIS (MapInfo Pro), SAS or SQL Server experience

'Pitney Bowes MapInfo is a challenging and vibrant place to work, promoting empowerment, creativity and exposure to all levels/functions of management.'
