

Modelling Consultant
£30,000 - £40,000 per annum
Location - Windsor

Pitney Bowes Business Insight is seeking a talented and highly motivated Modelling Consultant. This is an exciting opportunity to join the Strategy & Analytics team within a rapidly expanding and market leading global technology company at a key stage in its development. Based in the Windsor office, this position will report directly to the Modelling Services Manager.

Responsibilities will include:

- Evaluating the reliability of source information and organise results into a form compatible to conducting analysis
- Conducting statistical analysis independently
- Producing and delivering presentations to clients
- Analysing and working with complex data sources using various software tools.
- Assisting in the business development of Strategy & Analytics services
- Providing sales support
- Being involved in the development of new customer offerings

Qualifications & Experience:

- The successful candidates will hold a degree or equivalent qualification preferably gained within a mathematical or science based subject; relevant post-graduate qualifications would be advantageous
- Candidates should have relevant commercial experience (min 2 years)
- Candidates must be able to display an in-depth aptitude for statistics
- Candidates must be able to write relevant code for data manipulation purposes
- Experience of a GIS or mapping software (e.g. MapInfo Professional), SAS or SQL Server would be beneficial
- Candidates must have strong interpersonal skills
- Candidates must be able to articulate themselves well in writing
- It is essential that candidates have a good general level of IT literacy
- The ability to speak French or German fluently would be an advantage
